

MEMORANDUM

INTERMOUNTAIN POWER SERVICE CORPORATION

TO: S. Gale Chapman
FROM: Dennis K. Killian
DATE: August 27, 1991
SUBJECT: Burner Flame Stabilizers Purchase
FILE: 01.03.03, 14.9010

PAGE 1 OF 2

Please approve the attached purchase requisition for RJM Corporation to proceed with the fabrication of the burner flame stabilizers. This is for installation on Unit 2 in the Fall 1991 Outage, scheduled to begin October 28, 1991. **Total estimated cost of the flame stabilizers is \$1,800 per burner for a total cost for 48 burners of \$86,400.**

This is a sole source item because the flame stabilizers are unique to RJM Corporation and nothing even similar exists on the current market.

IPSC is recommending the addition of the flame stabilizer to B&W's existing burner to solve problems with flame stabilization and air flow. We will be responsible for the installation of the flame stabilizers.

Please reference the attached purchase requisition, flame stabilizer specification, plus RJM's Proposal #910614 dated June 17, 1991, addressed to IPSC and Proposal # 910614 dated August 2, 1991 addressed to LADWP.

Please contact Jerry Hintze or Aaron Nissen if you have further questions concerning this matter.
